

## Service Catalog

The Cloud Adoption team developed a set of services, based on industry and government best practices, to help agencies successfully implement cloud strategies. We offer:

- end-to-end migration planning and modernization assessments (starting with a cloud readiness assessment)
- migration strategy and approach
- migration roadmap and execution timelines
- security & governance models
- acquisition and oversight support service

The services will:

- impact the existing technology and security standards,
- require changes to configuration management and security compliance processes, and
- impact strategic roadmaps and investment planning

The GSA IT Centers of Excellence (CoEs) are partnering with Agencies to accelerate their IT modernization by leveraging private sector and government innovations and centralizing best practices and expertise.

### PRE-MIGRATION PMO SUPPORT

Establish a Cloud Adoption project plan with validated business, technical, cybersecurity, and reporting requirements.

### MIGRATION PLANNING SUPPORT

Cocreation of a comprehensive migration roadmap with sequenced execution paths, migration strategies, and establish migration guardrails to minimize risk, cost, and time to completion.

### SOLUTION ARCHITECTURE SUPPORT

Align the cloud strategy with agency enterprise architecture, design patterns and other standards.

### SECURITY

Review agency cloud security and architecture needs across several dimensions: rogue elements, data characteristics, privacy and confidentiality, data controls, access policies, and governance.

### GOVERNANCE

Bring approaches from other successful cloud governing models in both commercial and governmental organizations to establish oversight of the program.

### ACQUISITION SUPPORT

Develop innovative solutions to assist with acquisition strategy to develop and manage cloud-based contracts, SOW and best practices.
